

saunum

A sauna heater for public boutique saunas

saunum pro experience

Saunum Pro Experience unique heater with a sauna climate regulating system is ideal for creating an extraordinary sauna session in a more intensively used sauna. The large stone volume of Saunum Pro Experience and the patented air-blending system ensure exceptional steam that is soft and long, and evenly distributed throughout the sauna. The innovative steam mixed with cooler air allows you to breathe easier and enjoy the sauna without feeling fatigue and headaches. Using different heater settings, you can create a 5-in-1 spa solution, which allows you to transform a classic Nordic sauna into a sauna enriched with salt ions, a mild relaxation sauna, a humid-steam rich sauna, and a relaxing aroma sauna.

Heater/climate device suitable for
a public sauna or a larger steam room

saunum pro experience

With its elegant proportions and timeless design, Saunum Pro Experience complements any sauna interior. Choose between a minimalist closed or open stone basket in Nordic black. The Leil control unit offers effortless control of both the heater and the climate device – with just a few taps on the touch screen or your smart device.

Saunum Pro Experience brings the art of steam to a new level. Soft, oxygen-enriched steam ensures deeper relaxation and easier breathing, while the 5-in-1 spa solution transforms a traditional sauna into one enhanced with salt ions, gentle humidity, and soothing aromas.

How do Saunum's heater work?

Saunum's patented air-blending system traps the scorching steam, that rises under the ceiling of the sauna room, mixes it with cooler air on the floor surface, and directs the soft steam back evenly. This ensures a more even temperature of the steam, and the oxygen-enriched steam makes it easier to breathe. Water can be thrown more often to produce more steam, making the sauna air more humid, and ensuring more intense sweat.

With Saunum's patented method of enriching the air with salt ions, the salt ions from the natural salt spheres added to the sauna climate device are infused into the circulating air to reach the skin and respiratory tract.

An even more relaxing sauna experience is created with the help of the aroma system, which mixes sauna oil aromas with the steam. It is a healthy alternative to burning aromatic oil on hot stones.

Choose the heater with power adequate to the cubage of the sauna room

However, for non-insulated walls (brick, glass block, glass, concrete, floor tiles, etc.) a more powerful heater is needed. Add 1 m³ to the cubage of the steam room per each square meter of uninsulated wall. For example, a 10 m³ sauna room with a glass door corresponds to the power requirement of a 12 m³ sauna room.

Smart sauna control unit Saunum Leil

Saunum Leil is a next generation sauna controller that is convenient and easy to use. According to sauna data, Leil optimizes the time spent on heating and thereby also energy consumption. Three pre-settable sauna modes let you heat the sauna with just a few taps on the screen. With the help of **Saunum Leil Mobile**, you can control your sauna wherever you are at the moment. Sauna notifications are displayed on the user's mobile phone screen.

Sensational experience **relaxing 5-in-one spa solution**

Try different settings and steam intensities and add your favourites to the selection of steam types on the control unit.

Classic Nordic sauna

Temperature 60 – 100 °C

The climate regulating system:
speed level 1, the valve 25% open.

Humid steam-rich sauna

Temperature 45 – 60 °C

The climate regulating system:
speed level 2 or 3, the valve 100% open.

The lower the temperature, the more open the valve and the higher the speed of the climate regulating system, the more steam is generated when throwing water on a heater.

The mild, relaxing sauna

Temperature 40 – 55 °C

The climate regulating system: speed level 1, the valve at least 25% open, if you prefer a softer, more humid sauna.

Sauna enriched with salt ions

Temperature 40 – 100 °C

The climate regulating system: speed level 1, the valve 25% open. The salt spheres added to the climate device work at any temperature, if the sauna climate system is switched on.

Aroma sauna

Temperature 40 – 90 °C

The climate regulating system: speed level 1, the valve 25% open. Replace one of the salt spheres with an aroma bowl, add some Saunum aroma oil into it and enjoy!
